**By Ian Horrocks : Constructing the User Interface with Statecharts** despite the obvious power and sophistication of user interface development tools the majority of user interface software is difficult to understand because it is download and read constructing the user interface with statecharts constructing the user interface with statecharts spend your few moment to Constructing the User Interface with Statecharts:

13 of 13 review helpful Note the CONSTRUCTING and not Designing By RA Botha It is important to realize that this book is not about designing user interfaces It states that quite clearly in the beginning and with a title like this it is not

suppose to be The book assumes that you know some user interface design principles and are applying them in the general screen designs Although it is fine that the book assumes Behind most non trivial user interface screens lie complex webs of code that many practitioners in the software industry find difficult to control Despite the obvious power and sophistication of user interface development tools the majority of user interface software is difficult to understand because it is coded without an overall design In this book Ian Horrocks presents a proven technique for designing event driven software using the UCM architecture and the state From the Back Cover written quickly and easily tested using white box techniques repeatedly enhanced over the lifetime of a system modified with a minimal risk of introducing unwanted side effects regression tested without the need
