

Computer Graphics and Geometric Modeling

By David Salomon

| #5446531 in Books | 1999-05-28 | Original language: English | PDF # 1 | 9.75 x 7.50 x 1.751, 3.32 |
File type: PDF | 851 pages | File size: 20.Mb

By David Salomon : Computer Graphics and Geometric Modeling max k agoston ma ms phd cupertino ca 95014 usa british library cataloguing in publication data agoston max k computer graphics and geometric modeling possibly the most comprehensive overview of computer graphics as seen in the context of geometric modelling this two volume work covers implementation Computer Graphics and Geometric Modeling:

2 of 2 review helpful Not a good reference By Omid Karimi Despite my hopes this is not a good reference book for computer graphics and I am not sure if it is good for teaching either It lingers on side subjects that has no bearing with the main theme and is incomplete on topics that most matter to a computer graphics enthusiast Wasting pages on areas such as why calculators compute tangents so fast has nothing to do CG Ap This is a book for those interested in understanding how graphics programs work and how present day computer graphics can generate realistic looking curves surfaces and solid objects The book emphasizes the mathematics behind computer graphics and most of the required math is included in an appendix The main topics covered are scan conversion methods selecting the best pixels for generating lines circles and other objects geometric transformations and projectio

computer graphics and geometric modelling

taking a novel more appealing approach than current texts an integrated introduction to computer graphics and geometric modeling focuses on graphics modeling **epub** computer graphics and geometric modelling implementation and algorithms v 1 max k agoston on amazon free shipping on **pdf** this is a book for those interested in understanding how graphics programs work and how present day computer graphics can generate realistic looking curves surfaces max k agoston ma ms phd cupertino ca 95014 usa british library cataloguing in publication data agoston max k computer graphics and geometric modeling
