0 of 0 review helpful Horrible By My Opinion I really regret buying this book It jumps around and the way it explains things will make you even more confused Even all the stuff I already knew I read and was like what Gee I m glad I already know how that works and how to do that because if I didn t I would be completely lost 0 of 0 review helpful

Two Stars By JohnN JavaServer Faces or JSF brings a component based model to web application development that is similar to the model that has been used in standalone GUI applications for years. The technology builds on the experience gained from Java Servlets, JavaServer Pages, and numerous commercial and open source web application frameworks that simplify the development process. In JavaServer Faces, developers learn how to use this new framework to build real world web apps. About the Author: Hans Bergsten is the founder of Gefion Software, a company focused on Java services and products based on the J2EE technologies. Hans has been an active participant in the working groups for both the servlet and JSP specifications from the
