By Vladimir Rovenski : Geometry of Curves and Surfaces with MAPLE this concise text on geometry with computer modeling presents some elementary methods for analytical modeling and visualization of curves and surfaces the text being reviewed is quot;geometry of curves and surfaces with maplequot; by rovenski i had great hopes of learning some advanced plotting techniques in maple Geometry of Curves and Surfaces with MAPLE:

1 of 1 review helpful Jumble of disconnected ideas By Dr D The text being reviewed is Geometry of Curves and Surfaces with MAPLE by Rovenski I had great hopes of learning some advanced plotting techniques in Maple and perhaps some useful methods for the analysis of curves and surfaces Only the first expectation was partially realized Sophisticated plotting techniques were illustrated However I found most of the e This concise text on geometry with computer modeling presents some elementary methods for analytical modeling and visualization of curves and surfaces The author systematically examines such powerful tools as 2 D and 3 D animation of geometric images transformations shadows and colors and then further studies more complex problems in differential geometry Well illustrated with more than 350 figures reproducible using Maple programs in the book the work is devot I was hunting for a book that would provide a set of practical exercises for the students of a graduate course entitled Geometric Modeling for Computer Graphics The title of nbsp this book sounds appealing for such a purpose Almost every topic yo
