18 of 18 review helpful Another Great LightWave Book By A Customer The last LightWave Applied book written by this team was used as a textbook at the University where I was studying 3D animation I loved it and my skills have vastly improved as a result I was glad to see another book released by the same group except Scott Wheeler doesn t seem to have been involved with this edition Basically this book follows the same Written for users of all skill levels

this tutorial teaches animators how to master LightWave 6 5 through the development of actual projects With more than 600 images users will be treated to in depth tutorials on using the software s features to build detailed and realistic objects like buildings cars and mountains From showing basic functions of Modeler and Layout to creating an entire architecture landscape with camera fly through this book gives in depth cover About the Author Joe Tracy was the founding editor of New Tekniques a magazine recognized as the top resource for LightWave artists and animators He is the author of Web Marketing Applied He lives in Santa Barbara California Dave Jerrard is a special effect
