**By Luis Puig, J J Guerrero : Omnidirectional Vision Systems: Calibration, Feature Extraction and 3D Information (SpringerBriefs in Computer Science)** springerbriefs in computer science systems calibration feature extraction we decide to perform a 3d reconstruction from two omnidirectional images calibration feature extraction and 3d springerbriefs in computer science book series omnidirectional vision systems Omnidirectional Vision Systems: Calibration, Feature Extraction and 3D Information (SpringerBriefs in Computer Science):

This work focuses on central catadioptric systems from the early step of calibration to high level tasks such as 3D information retrieval The book opens with a thorough introduction to the sphere camera model along with an analysis of the relation between this model and actual central catadioptric systems Then a new approach to calibrate any single viewpoint catadioptric camera is described nbsp This is followed by an analysis of existing methods for calibratin From the Back Cover This work focuses on central catadioptric systems from the early step of calibration to high level tasks such as 3D information retrieval The book opens with a thorough introduction to the sphere camera model along with an analysis of the
