From Springer : Knowledge Cartography: Software Tools and Mapping Techniques (Advanced Information and Knowledge Processing)

software tools and mapping techniques on both paper and with software knowledge cartography software advanced information and knowledge processing before part 2 turns to knowledge maps for information analysis with software knowledge cartography tools and mapping techniques advanced Knowledge Cartography: Software Tools and Mapping Techniques (Advanced Information and Knowledge Processing):

Focuses on the process by which manually crafting interactive hypertextual maps clarifies one's own understanding communicates it to others and enables collective intelligence The authors see mapping software as visual tools for reading and writing in a networked age In an information ocean the challenge is to find meaningful patterns around which we can weave plausible narratives Maps of concepts discussions and arguments make the connections between ideas From the Back Cover Focuses on the process by which manually crafting interactive hypertextual maps clarifies one's own understanding communicates it to others and enables collective intelligence The authors see mapping software as visual tools

knowledge cartography software tools and mapping
