series kindle edition by andrew crabtree mark rouncefield peter tolmie download it once and read it on Doing Design Ethnography (Human-Computer Interaction Series):

Ethnography is now a fundamental feature of design practice taught in universities worldwide and practiced widely in commerce. Despite its rise to prominence, a great many competing perspectives exist and there are few practical texts to support the development of competence. Doing Design Ethnography elaborates the ethnomethodological perspective on ethnography, a distinctive approach that provides canonical studies of work in and for design. It provides From the reviews: "The book is aimed at practitioners and students. hellip the book does actually include some good practical tips on approaches and tools for gaining access to a work situation, gaining trust and approval of users, and recording observ
