By Louis G. Birta, Gilbert Arbez : Modelling and Simulation: Exploring Dynamic System Behaviour (Simulation Foundations, Methods and Applications) exploring dynamic system behaviour simulation foundations methods and applications 2013 modelling and simulation exploring dynamic system behaviour simulation foundations methods modelling and simulation exploring dynamic system behaviour simulation foundations methods and applications Modelling and Simulation: Exploring Dynamic System Behaviour (Simulation Foundations, Methods and Applications):

This textbook presents a practical introduction to the fundamental aspects of modelling and simulation It provides the necessary foundations both for those wishing to learn about this methodology and also for those who have a need to apply it in their work Illustrative examples are drawn from projects formulated within the domains of both DEDS and CTDS Features presents a project oriented perspective describes an activity based conceptual modelling framework ABC From the Back Cover Modelling and simulation provides invaluable support for the design and evaluation of dynamic systems offering multi faceted tools that are unconstrained by discipline boundaries This fully updated and expanded new edition of Modelling
