Digital fringe projection DFP techniques are used for non contact shape measurement of 3D images In the rapidly expanding field of 3D high speed imaging the demand for DFP continues to grow due to the technology rsquo s fast speed flexibility low cost and high accuracy High Speed 3D Imaging with Digital Fringe Projection Techniques discusses the generation of digital fringe with digital video projection devices covering a variety of co a timely publication that comprehensively describes digital fringe projection techniques for 3D surface measurement and guides you to the research frontier in a friendly manner You will be eager to develop such a system or improve your own system by tes
