human computer interaction series new updated the end user development End User Development (Human-Computer Interaction Series):

This book makes important aspects of the international discussion on End User Development EUD available to a broader audience. It offers a unique set of contributions from research institutes worldwide addressing relevant issues and proposing original solutions. This broad look at the emerging paradigm of End User Development will inspire every reader to appreciate its potential for the future. Indeed, the editors hope that readers and end users will themselves. From the Back Cover: This book constitutes the refereed proceedings of the 2nd International Symposium on End User Development (IS EUD 2009) held in Siegen, Germany, in March 2009. The 12 revised full papers presented together with 2 invited talks and 2 ref.
