1 of 1 review helpful Combine a cookbook with a journal and you might wind up with this By Jerry Saperstein This is kind of quirky book It isn't for designers per se but it is about design It isn't quite a web marketing guide but it has a lot of interesting discussions on marketing on the web And it's filled with personal opinions that often have no support It is a fun read and there is a lot This book is for designers developers and product managers who are

charged with what sometimes seems like an impossible task making sure products work the way your users expect them to You'll find out how to design applications and websites that people will not only use but will absolutely love The second edition brings the book up to date and expands it with three completely new chapters Interaction design the way the apps on our phones work the way About the Author Lukas Mathis is the Frontend Lead at Swiss software company Appway the leader in client onboarding for the financial services industry His blog on design and usability at ignoethcode.net is read by tens of thousands of people each month
