In today s world user interfaces have to be highly dynamic asynchronous and reliable To meet these demands the programming world is undergoing a radical shift towards something called Functional Reactive Programming FRP or just Reactive Programming FRP offers programmers a new way to construct their applications so that they respond directly to change And developers spend less time tracing obscure problems and more time focusing on what their code shoul About the Author Timo Tuominen has used FRP and RxJava extensively as an architect of a major

Android project for Samsung while working with Futurice As a consultant he has developed dozens of agile projects on almost all relevant platforms ndash
