Analysis Techniques for the Human Body:

2 of 9 review helpful Truly dissapointed By Jorge Castro Castillo At first look the first impression about the book is the cover JUST PLAIN And this cover show a real preview about the book PLAIN When you talk about MODELING then aestheticism is a important matter but this book talk about MATHS Just theory nothing practice You had 3dstudio Maya Lightwave or the cheap blender and want to start model This work aims to cover the areas of modelling and animating 3D synthetic human models at a level that is useful to students researchers software developers and content generators It provides particular emphasis on facial and gesture characteristics About the Author Nikos Sarris received his Ph D from the Aristotle University of Thessaloniki in 3D modelling Techniques for the Human Face and his Master of Engineering MEng degree in Computer Systems Engineering from the University of Manchester Institute
