**From Springer : Robotic Fabrication in Architecture, Art and Design 2014** wes mcgee monica ponce de leon editors robotic fabrication in architecture art and design 2014 design and fabrication of robot manufactured joints for a curved folded thin shell structure made from clt christopher robeller seyed sina nabaei and yves weinand Robotic Fabrication in Architecture, Art and Design 2014:

Robotic automation has become ubiquitous in the modern manufacturing landscape spanning an overwhelming range of processes and applications from small scale force controlled grinding operations for orthopedic joints to large scale composite manufacturing of aircraft fuselages Smart factories seamlessly linked via industrial networks and sensing have revolutionized mass production allowing for intelligent adaptive manufacturing processes across a broad spectrum From the Back Cover Robotic automation has become ubiquitous in the modern manufacturing landscape spanning an overwhelming range of processes and applications from small scale force controlled grinding operations for orthopedic joints to large scale composi
