This book provides a platform for addressing human factors challenges in software and systems engineering both pushing the boundaries of current research and responding to new challenges fostering new research ideas in the process This book is intended for researchers professional software and systems engineers and human factors and human systems integration experts to help them address societal challenges for next generation systems with applications for meeting From the Back Cover This book provides a platform for addressing human factors challenges in software and systems engineering both pushing the boundaries of current research and responding to new challenges fostering new research ideas in the process This bo
