By Geoffrey Taylor, Lindsay Kleeman : Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics) visual perception and robotic manipulation 3d object recognition tracking and hand eye coordination springer tracts in advanced robotics springer tracts in advanced robotics visual perception and robotic manipulation 3d object recognition tracking and hand eye coordination Visual Perception and Robotic Manipulation: 3D Object Recognition, Tracking and Hand-Eye Coordination (Springer Tracts in Advanced Robotics):

This book moves toward the realization of domestic robots by presenting an integrated view of computer vision and robotics covering fundamental topics including optimal sensor design visual servo ing 3D object modelling and

recognition and multi cue tracking emphasizing robustness throughout Covering theory and implementation experimental results and comprehensive multimedia support including video clips VRML data C code and lecture slides this book is a p From the Back Cover As autonomous robots expand into the service domain new solutions to the challenge of operating in domestic environments must be developed Widespread adoption of service robots demands high robustness to environmental change and operationa
