**By Shengyong Chen, Y. F. Li, Jianwei Zhang, Wanliang Wang : Active Sensor Planning for Multiview Vision Tasks** vision sensors have limited fields of views and can only quote; seequote; a portion of a scene from a single viewpoint to make the entire object visible the sensor shengyong chen youfu li jianwei zhang wanliang wang active

sensor planning for multiview vision tasks Active Sensor Planning for Multiview Vision Tasks:

This unique book explores the important issues in studying for active visual perception The book rsquo s eleven chapters draw on recent important work in robot vision over ten years particularly in the use of new concepts Implementation examples are provided with theoretical methods for testing in a real robot system With these optimal sensor planning strategies this book will give the robot vision system the adaptability needed in many practical applications From the Back Cover Vision sensors have limited fields of views and can only see a portion of a scene from a single viewpoint To make the entire object visible the sensor has to be moved from one place to another around the object to observe all features of
