From Brand: Springer : Active Perception and Robot Vision (Nato ASI Subseries F:) harry wechsler p cm nato asi series series f computer and system sciences; this nato asi on active perception and robot vision was developed by nato asi subseries f the papers in this book are the result of the nato conference quot;cognitive modelling and inter active active perception and robot vision Active Perception and Robot Vision (Nato ASI Subseries F:):

Intelligent robotics has become the focus of extensive research activity This effort has been motivated by the wide variety of applications that can benefit from the developments These applications often involve mobile robots multiple robots working and interacting in the same work area and operations in hazardous environments like nuclear power plants Applications in the consumer and service sectors are also attracting interest These applications have highlighted
