Robotic Applications:

This book presents in a systematic manner the advanced technologies used for various modern robot applications. By bringing fresh ideas, new concepts, novel methods, and tools into robot control, robot vision, human-robot interaction, teleoperation of robot, and multiple robots system, we are to provide a state-of-the-art and comprehensive treatment of the advanced technologies for a wide range of robotic applications. Particularly, we focus on the topics of advanced robot applications. From the Back Cover: This book presents in a systematic manner the advanced technologies used for various modern robot applications.
